

## Vegan Statement

### **On Faber-Castell Products**

Faber-Castell products are companion for life.

Protection of human and animal life as well as integrity of environment are powered by the Faber-Castell Corporate Essentials and our products are manufactured under these aspects all over the world.

We confirm that Faber-Castell products are manufactured by using non-animal derived raw materials. Ingredients of botanical or synthetic origin are always preferred choice for our formulations. In a few exceptional cases, animal-derived material is processed.

In our production sites animals have not been hurt, tortured or kept in non-species-appropriate housings. Faber-Castell never carried out or ordered animal testings and declines them for decades.

Our suppliers provide us with information concerning the origin of the delivered product. The majority of chemical raw materials used by Faber-Castell are vegan confirmed by the suppliers. In a few cases the absence of traces of not intentionally added animal-derived chemicals cannot be guaranteed.

Faber-Castell products are vegan considering the aspects described above.
